

TREE TOP

PROFESSIONAL TREE WORK HARNESS

HTP0468

The unique requirements of professional tree climbers/arborists.

The reinforced bridge becomes an integral part of the workers natural balance thanks to sliding ring technology so the wearer is always in the centre of gravity, enabling maximum freedom of movement. Multiple tool loops are positioned on the wide padded waist belt, including a chainsaw rated attachment loop central to the back. Ideal for arbour work, vertical climbing and work positioning.

Breathable mesh fabric in the generous waist belt and leg pads gives the wearer support and comfort while helping to keep them cooler and dryer.

RATING: 136kg

LIFESPAN: 10 Years
